CAREER OBJECTIVE

Motivated and detail-oriented MCA graduate with a strong foundation in programming, data structures, and software development. Eager to begin a professional career in the IT industry where I can contribute to projects, grow technically, and bring value through hard work and problem-solving.

EDUCATION

- **Master of Computer Applications (MCA)(Pursuing)**.

Dayananda Sagar College of Arts, Science and Commerce Bengaluru. 2024 – Present

- **Bachelor of Computer Applications (BCA)**

Manorama College of Bachelor of Computer Applications. 2021– 2024

CGPA:8.66/10

TECHNICAL SKILLS

- Java, C, Python, SQL, PHP, JavaScript.
- **Frontend Technologies**: HTML5, CSS3, JavaScript, React.js.
- **Backend Technologies**: Python, Django Framework, PHP.
- **Database Management**: MySQL, Oracle Database, Oracle AI Vector Search.
- **Cloud Technologies**: Oracle Cloud Infrastructure (OCI), Cloud Computing.
- **Development Tools**: GitHub, Visual Studio Code, Atom.
- **Core Concepts**: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures.
- **Software Development**: Full Stack Development, Web Development, E-commerce Development.

PROJECTS

1. **ThalaPulse – Intelligent Thalassemia Awareness & Prediction Platform (MCA)**
   Developed ThalaPulse, a full-stack healthcare web application using the MERN stack to provide thalassemia awareness, personalized user workflows, and predictive health analysis. Implemented secure authentication and role-based routing to dynamically guide users based on health status. Integrated a Flask-based **machine learning (ML)** microservice to process clinical parameters and predict risk levels (Low, Medium, High) through RESTful APIs. Designed responsive and accessible user interfaces with conditional navigation, dashboards, and engagement modules. Focused on modular architecture, scalability, and data-driven decision support to enhance user experience and healthcare awareness through intelligent system design.

2. **E-Commerce Website Development | Final Year Major Project at HAEGL Technologies, Pvt, Ltd.**

- Designed and developed comprehensive online shopping platform with product catalog, shopping cart, and secure checkout system.

- Implemented user authentication, product management, and order processing functionality.
- Created responsive user interface supporting multiple device types and browsers.
- Integrated MySQL database for efficient data storage and retrieval operations.

- **Samsung Solve for Tomorrow 2025 | Innovation Competition**

- Participated in national-level technology innovation challenge.
- Demonstrated problem-solving skills and technical innovation capabilities.

CERTIFICATIONS

- Java Foundations - Oracle Corporation (2025).
- Database Foundations - Oracle Corporation (2025).
- Artificial Intelligence & Machine Learning - Oracle Cloud Infrastructure (2025).
- Python Programming - Microsoft Corporation (2025).
- Data Structures - Infosys Springboard (2025).

INTERNSHIP

Web Full Stack Development Intern HAEGL Technologies Pvt. Ltd. May 2024 - July 2024

- Developed and maintained e-commerce website functionality using Python and Django framework.
- Collaborated with cross-functional team to implement backend solutions and database optimization.
- Participated in code reviews and followed agile development methodologies.
- Enhanced user interface components and improved application performance by 15%.
- Gained hands-on experience in full-stack web development lifecycle.

RESEARCH PAPER

AI-Driven Pregnancy Risk Prediction in Women with Thalassemia Using CBC Data: A Proof-of-Concept Study

- Conducted an **AI and machine learning–based research study** to predict pregnancy-related risk in women with **thalassemia traits** using **Complete Blood Count (CBC) data**.

- Designed and trained a **Random Forest classification model** using haematological parameters and haemoglobin fractions from a publicly available dataset.

- Performed **data preprocessing, feature engineering, and model evaluation** to identify important predictors such as haemoglobin levels and red blood cell indices.

- Developed a **proof-of-concept framework** demonstrating the use of **low-cost, routinely available blood tests** for maternal risk assessment in resource-limited settings.

- Authored and structured the **research methodology, analysis, and findings** with focus on healthcare AI applications.

EXTRACURRICULAR ACTIVITIES

- Volunteered at college-level fests, working effectively in teams and communicating with diverse groups in fast-paced environments.
- Won 2nd prize in an intercollege dance fest, demonstrating discipline, coordination, confidence, and performance under pressure.
- Completed Microsoft Azure training and deployed a personal portfolio, showcasing quick learning and adaptability to new technologies.
- Attended Agile Software Engineering training using JIRA, gaining exposure to collaborative workflows and modern development practices.

PERSONAL DETAILS

Date of Birth: 22nd Aug 2003.
Languages Known: English, Kannada, Hindi.
Hobbies: Reading tech blogs, listening to music, Singing.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.

Place: Gadag.
